

TECHNICAL DATA SHEET
REFLECTIVE VEST art. 9194/9195

Area of use:

Reusable protective clothing, for signaling the presence of the wearer, ensuring its detection and good visibility in any light conditions, during the day or in the light of the headlights, at night, as well as for protection against superficial, minor, mechanical aggression.

Technical standards of reference:

EN ISO 13688:2013 - Protective clothing, general requirements

EN ISO 20471:2013+A1:2016 – Class 2 - Signaling and high visibility clothing for professional use. Test methods and requirements.

Design features:

Reflective vest with straps, Velcro closing system and straps reflectors applied by sewing.

Technical features:

- Material: 100% polyester
- Color: fluorescent yellow / fluorescent orange
- Reflective strip size: 5 cm wide
- Sizes: L, XL, XXL, XXXL
- Reflective performance: class 2

Instruction for use: The product will be used only for the intended use area: it is used only over any other type of protective or work clothing, and during wearing it must be closed and adjusted on the body to avoid the risk of hanging with tools and instruments handled by the user or the risk of entanglement by the moving parts of machines. The product will not be used in advanced state of dirtiness, as the characteristic of the fluorescence or retro-reflection are diminished and do not provide sufficient protection. Before each use check the product; the product shall not present discolored areas (more than 5% of the surface) damaged, missing, unstitched, burnt, or decayed areas of retro-reflective strips. The product will be suitable to the wearer from a dimensional point of view. It will not be used in workplaces that present occasional contact with small flames or hot materials. It is not anti-static - it is not used in environments with a potentially explosive atmosphere.

Maintenance:

Manual or automatic washing, using household washing agents, at a maximum temperature of 40°C, drying in tumble dryer is not allowed. Do not iron. It is prohibited to use the bleachers. Maximum number of washing cycles: 25 cycles.

Marking:

The permanent label of the product contains: the code, the size, the CE mark, fabric composition, icons representing maintenance instructions.

Packaging:

The product is individually packaged in plastic bags, which includes instructions for use.

Storage:

It is stored in closed spaces, well ventilated, in the original packaging, protected from moisture and direct sunlight, at temperatures between +10 ÷ 25°C.
